

iSPM100 Zello User manual (Android & iPhone)

Part 1: Android phones:

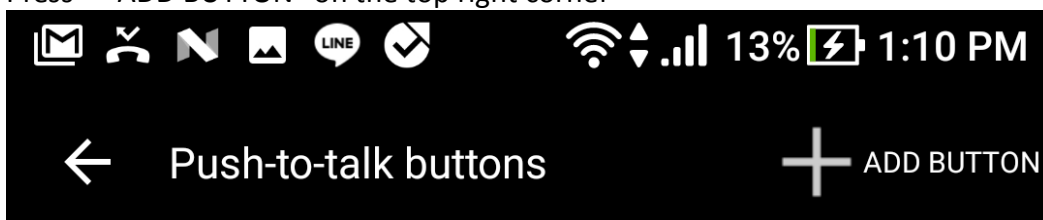

1. Plug iSPM100 to your phone's 3.5mm ear-phone jack, and turn on iSPM100

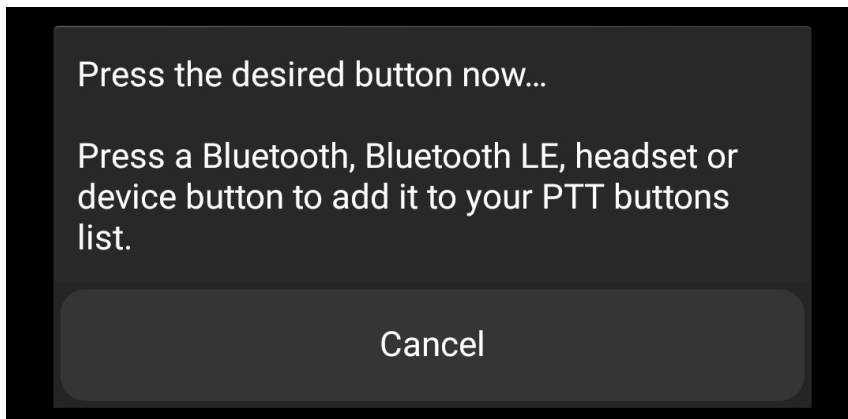

2. Before using iSPM100, make sure your phone's Bluetooth is turned off, go phone's "Setting", turn off the Bluetooth.
3. Run Zello, tap on "Menu" icon (three vertical dots) on the top right, then "Options" then "Push-to-talk buttons"

4. Press "+ ADD BUTTON" on the top right corner

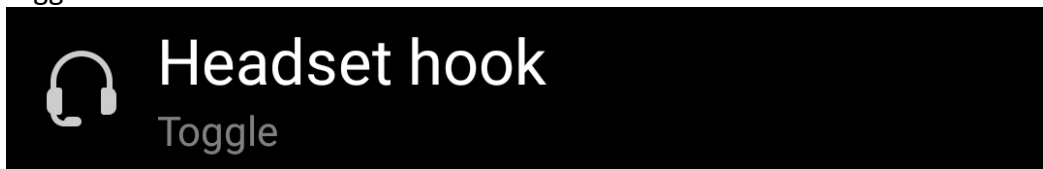

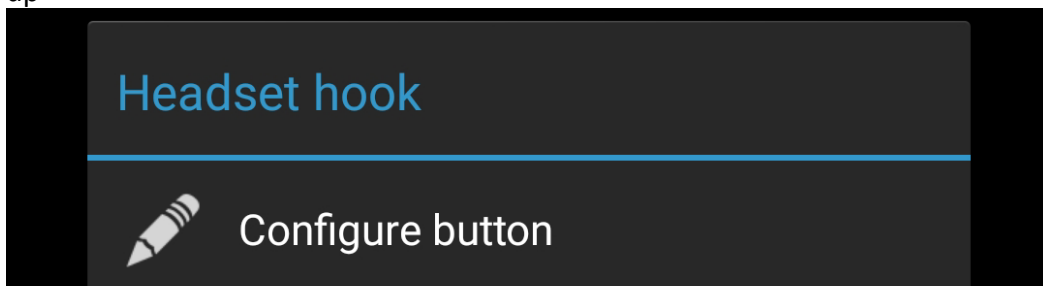

5. When “Press the desired button now..” message shows up, Press the “**Answer**” button(the black round button below PTT button)

“Headset hook” is added to the PTT button list, now we need to set its action to toggle

press on “Headset hook” for few seconds until “Configure button” option shows up

press on “Configure button”, in “Push-to-talk button action” drop-down list, choose “Toggle”

Push-to-talk button action

Toggle

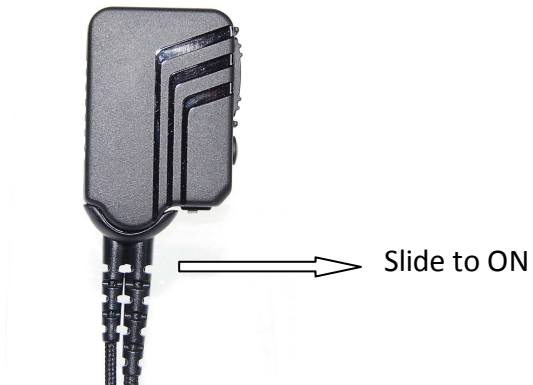

Handle button in the background when possible

6. Now iSPM100 is ready to use.

Part 2: iPhone:

1. Plug iSPM100 to your iPhone's 3.5mm ear-phone jack, turn on iSPM100

2. Run Zello, iSPM100 is ready to use, no setting needed.
